ABOUT ESPES

ESPES Foundation

ESPES foundation took place during the conclusion of the 5th Congress of the British Association of Paediatric Endoscopic Surgeons (BAPES) in September 2004, organized in Paris together with other European Partnerships as GECEI (France) - which hosted the Congress-, GPES (Germany), and SIVI (Italy).

We met in good spirit and ready to consider the interesting British proposal that aimed to unify the different European efforts to create a strong European society. The purpose was to conceive a society that could deal with both the more immediate and medium-long term difficulties related to the scientific development, institutional and commercial relationships and training of new specialists. However, the idea required more collective thinking. The meeting served to plant seed which has taken a lot of time and efforts to germinate, thanks to the input from several Societies: mainly the French, Italian, Swiss, Spanish, Turkish and with the incorporation of other European Societies of Pediatric Endosurgery year after year. In the following BAPES Meeting held outside Great Britain -which takes place every three years- in Istanbul (2007) and Bern (2010), we continued the work on the British proposal, giving birth to the European Society of Paediatric Endoscopic Surgeons (ESPES). The Society was led to its creation by the enthusiastic Dr. Azad Najmaldin from Leeds, a leading member, co-founder and former President of the BAPES, and with the participation, as founding members of

Surgeons (ESPES). The Society was led to its creation by the enthusiastic Dr. Azad Najmaldin from Leeds, a leading member, co-founder and former President of the BAPES, and with the participation, as founding members of outstanding Endoscopic Paediatric Surgeons from Britain, Italy, France, Germany, Spain, Slovakia, Turkey, Romania, Poland, Austria, Norway and Switzerland. It debuted in November in London, with the celebration of its first Congress (2nd to 5th November 2011).

Renowned Pediatric Surgeons from 10 European countries actively participated in the committees. During the Constitutional Assembly of the Society. Bylaws were written and the first Board of Directors was set up: headed by Azad Najmaldin -main driver and leader, true alma mater of the idea.

During the Congress, three lectures were given, 2 specialized round tables were held and 48 oral communications and 15 posters were presented.

All this was a great kick-off for this newborn ESPES, which began its journey with strength and sincere wishes for a unified European Pediatric Endosurgery.

9th ESPES ANNUAL CONGRESS

Dear Colleagues,

in September 2019 we will have the pleasure of hosting the 9th European ESPES Congress in Italy. As a founding member, I am proud to have witnessed the birth and growth of a society that in recent years has gathered more and more acclaim not only among the leading experts in pediatric and European mini-invasive surgery but also among more or less young surgeons who believed in the bet of "pediatric" mini-invasiveness.

Thanks to the work of all of us, ESPES has had the ability to overcome the barriers of single and sometimes small national companies, uniting them in a single container; this container collects the experience in pediatric, neonatal and fetal minimally invasive surgery of most of the European pediatric surgeries and represents an opportunity for a continuous growth and a cultural exchange among surgeons from all over Europe and beyond.

I hope that the Congress of Vicenza (a city declared a UNESCO World Heritage Site) can offer a perfect mix between specialist surgical updating and artistic and culinary culture.

We look forward to seeing you in Vicenza, hoping to share also in 2019 a unique experience to remember in the years to come.

Congress Chairman
Fabio Chiarenza

9th ESPES ANNUAL CONGRESS

Welcome Message

Dear Colleagues, Dear Friends,

Welcome to the 9th Congress of The European Society of Pediatric Endoscopic Surgeons! This year's meeting will be held in Vicenza an Italian historic city ; it will be jointly held with a number of National Society of Minimally Invasive Pediatric Surgery as SIVI (Italy), Geci (France) , RSPLS (Romanian), BAPES (England), BELAPS (Belgium,Luxembourg,-Netherlands) Poland Group and Turkish Group..

We are looking forward to an exciting program highlighting innovations, research and education in pediatric minimally invasive surgery.

Don't forget: there is something for everyone from the junior surgeon to the expert in ESPES. Our, Your society has the dream and commitment to be the leading Society in new surgical ideas and techniques for the benefit of our little patients. The ESPES annual congress is the ideal place to exchange those ideas, show the new techniques and discuss them openly and directly with colleagues from over Europe and even from elsewhere. Our moto must be offering the most safe and minimal invasive technique available for patients in their local environment. One of the most important tasks of ESPES is helping colleagues from over Europe to reach this goal.

beginning of the ESPES adventure. Quality is increasing by the way and you will see that Fabio Chiarenza, the ESPES Educational and Scientific Committees and Fabio's local team have put together a very exciting pre-congress and congress program as well as social highlights.

It's also a pleasure to know that several National Societies will join again the afternoon before the congress, organizing round tables, panel discussions and presentations. Don't hesitate to push the door of these sessions so has we encourage you to book for one of the master classes or hands on courses in the morning.

ESPES is going strait: the committees are working hard, the website is evolving, new Board members you elected will inject new ideas and we will have a new President Elect. Future is there.

This is finally the occasion of giving special thanks to Paul Philippe who acted so long as treasurer and was so committed to this crucial task for a Society, to Jozef Babala who did, with his friends, an incredible job on the website and also to Holger Till who leaves in order to become the next President of IPEG, a new occasion to remember all of you the great opportunity you will have next year joining for an incredible first: EUPSA, IPEG and ESPES in the same congress area at the same time in Vienna!

Last but not least it's an honor for me to thank our past President Ciro Esposito who will also leave the Board. He did an invaluable job in stabilizing ESPES, reinforcing links with other societies and creating such a friendly atmosphere into the ESPES. Thanks Ciro! I look forward to seeing you in Vicenza!

Sincerely yours,

Henri Steyaert

PROGRAMME

9th ESPES

11th SEPTEMBER 2019

8:30-12:30
a.m

MASTERCLASS ROBOTIC SURGERY
Chairman: H. Steyaert, H. Lardy

SALA A

8:30
a.m Registration

9:00
a.m Tips and Tricks in installation and docking
T. Blanc, H. Lardy

9:30
a.m Learning curve in robotic surgery: really shorter?
I. Kassite

10:00
a.m Applications of fluorescence imaging using indocyanine green
M. Escolino

10:30
a.m COFFEE BREAK

11:00
a.m Hybrid operating room; how a radiologist can help a surgeon
M. Laureys

11:30
a.m Augmented reality and laparoscopy: the digital revolution in the OR!
N. Bourdell

12:00
p.m Italian Robotic Experience. Results of an Italian Multicentric Survey
M. Lima

12:30
p.m Training on virtual robotic station

ANNUAL CONGRESS

8:30-12:00
a.m

MASTER CLASS OF MIS IN PEDIATRIC UROLOGY
Evidence based results after 25 years of mis in pediatric urology
Chairman: C. Esposito, F. Varlet

8:30
a.m

Upper Urinary Tract
Evidence based medicine on the minimally invasive surgical management of uretero pelvic junction obstruction (UPJO)
P. Szavay

9:00
a.m

Upper Urinary Tract
Laparoscopic treatment of renal cancer in children, review of oncologic and surgical complications
F. Varlet

9:30
a.m

Lower Urinary Tract
Long term results of MIS management of vesico ureteral reflux (VUR) and analysis of postoperative bladder dysfunction after laparoscopic and robotic extravesical ureteral reimplantation in children
C. Esposito

10:00
a.m

COFFEE BREAK

10:30
a.m

Lower Urinary Tract
Evidence based results on the endoscopic treatment of urinary stones
P. Caione

11:00
a.m

Lower Urinary Tract
Long-term outcomes in primary obstructive megaureter (POM) treated by endoscopic balloon dilation
J. M. Angulo

11:30
a.m

Lower Urinary Tract
Current surgical practice about the management of ureterocele in single and duplex system
H. Till

12:00
p.m

Presentation of complicated and difficult cases
Faculty

SALA B

11th SEPTEMBER 2019

8:30-1:15
a.m p.m.

WORKSHOP IN PEDIATRIC MIS

electrosurgical techniques, vascular sealing and mechanical sutures in pediatric laparoscopic surgery

Chairman: I. Draghici, A. Pini Prato

SALAC

- 8:45
a.m Modern dissection and hemostasis techniques in pediatric laparoscopic surgery - advantages and indications
I. Draghici
- 8:30
a.m Monopolar hook cautery
J. Babala
- 9:00
a.m LigaSure, ENSEAL (vessel-sealing systems) - principles and indications of the sealing of the vascularpedicles
A. Pini Prato
- 9:15
a.m UltrasonicScalpels (Lotus, Harmonic) - benefits in laparoscopic dissection
E. Van Der Veken
- 9:30
a.m MIS of parenchymalorgans (hepatectomy, splenectomy, thymectomy etc.)
J. Breaud
- 9:45
a.m Techniques of laparoscopic mechanical sutures in pediatric surgery - linear, circularstaples
M. Mendoza Sagaon
- 10:00
a.m Laparoscopic appendectomy with linear stapler - cost / benefit ratio
P. Montupet
- 10:15
a.m The technique of laparoscopic intestinal resection
V. Di Benedetto
- 10:30
a.m COFFEE BREAK
- 11:00
a.m PRACTICAL PART
- 01:15
p.m Discussions, conclusions, distribution of certificates

SESSION I GASTROINTESTINAL

Chairman: M. Cheli, M. De Diego Suarez

Experience and Learning Points in the Management of Achalasia Cardia in Children

A. Daya Ram

Can laparoscopy-assisted percutaneous endoscopic gastrostomy (PEG) prevent major gastrostomy complications?

D. Demirel

How to treat chemical burns of the esophagus? - experiences with the Home Catheter Ballon Dilatation as an effective method for treatment

O. H. Diez

Long-term outcome of preserving the native esophagus in long gap oesophageal atresia by thoracoscopic traction technique

M. Lindeboom

Acute gastric volvulus in children: our experience in management and laparoscopic gastropexy

L. Tarallo

The effect of Laparoscopic sleeve gastrectomy in treatment of type 2 Diabetes Mellitus in children and adolescents

M. Soliman

Laparoscopic versus open pyloromyotomy. Our experience

M. Lebet

Laparoscopic Versus Open Pyloromyotomy in Treatment of Infantile Hypertrophic Pyloric Stenosis

H. Sheir

Mininvasive management of Hypertrophic Pyloric Stenosis : a 10 years single center review

F. Destro

ANNUAL CONGRESS

9:00-10:00
a.m

SESSION II UROLOGY

Chairman: P. Philippe, S. Shehata

Laparoscopic two stage fowler_stephen orchiopexy (FSO) versus laparoscopic staged traction orchiopexy (SLTO) in treatment of intra-abdominal testis in pediatrics

M. Elsherbiny

Analysis of the volume change of the testis after inguinal hernia repair using the PIRS method - pilot study

P. Wolak

Anesthesiologic and antalgic aspects of infants undergoing laparoscopic inguinal hernia repair

P. Midrio

A new device for mini-perc in pediatric renal stone treatment

P. Caione

Comparison of treatment methods for stone in lower calyx in children with flexible uretereoscopy and microperc - prospective study

A. Halinsk

Indications and Pitfalls of Laparoscopic or Laparoscopy-Assisted Urinary System Stone Removal

B. Tokar

Endourological treatment of primary obstructive megaureter: ten year experience

E. Mele

Laparoscopic lich-gregoir reimplantation in day-case surgery for the treatment of high-grade unilateral vesico-ureteral reflux in children

F. Varlet

Laparoscopic two stage spermatic vessels sparing procedure for intra-abdominal undescended testis

V. David

12th SEPTEMBER 2019

10:00-11:00 a.m. SESSION III GASTROINTESTINAL
Chairman: M. Metzelder, B. Tokar

MIS endoscopic treatment for gastric output obstruction

V. Soroutchan

Minimally invasive surgery (mis) versus open surgery (os) in newborns with congenital duodenal obstruction (cdo) and esophageal atresia (ea). short term outcome comparative study

M. Andretta

preliminary results of laparoscopic stapled duodeno-duodenostomy for duodenal atresia

L. Pio

Laparoscopic management of jejuno-ileal atresia. A systematic review and meta-analysis

B. Maqbool

Long term follow-up and outcomes in laparoscopic duodenal atresia repair. Analysis of our experience

C. Blevé

Laparoscopic hepatico-duodenostomy associated with intraoperative flexible endoscopic check in the treatment of choledochal cyst: preliminary experience and technical details

G. Mattioli

Transrectal access in the surgical treatment of biliary atresia

A. Gusev

Gallbladder duplication : timing and pitfalls of laparoscopic cholecystectomy in children

C. Piolat

Unusual case of abdominal mass: endoscopic diagnosis of Rapunzel syndrome

A. Centonze

ANNUAL CONGRESS

10:00-11:30 Open Coffee Break
a.m

11:00-12:00 SESSION IV GASTROINTESTINAL
a.m p.m. Chairman: I. Cano, C. Piolat

Minimally Invasive surgery for Hirschsprung patients with persistent postoperative obstructive symptoms

A. Pini Prato

Comparison of perioperative outcomes between laparoscopic and open partial splenectomy in children

S. Gfroerer

Experience of minimally invasive surgery in children with neurogenic tumors of thoracoabdominal localization associated with IDRF

S. R. Talygov

Laparoscopic Hill Snow Repair for Physiologic GERD in our Centre. Long term follow-up

C. Blevé

Comparison of inflammatory stress response between laparoscopic and open approach for pediatric inguinal hernia repair in children

M. Jukić

Development in the surgical treatment of acute appendicitis: a single center experience

F. Bartoli

Laparoscopic appendicectomy in children; current practice and future challenges in Malta. A preliminary report

C. Borg

Laparoscopic correction of a prenatally detected pouch colon type 2 malformation

D. Codrich

12th SEPTEMBER 2019

12:00-1:00
p.m.

SESSION V GASTROINTESTINAL
Chairman: M. Haddad, J. Moreira Pinto

The laparoscopic approach to the splenic cysts in children
E. Özçakır

Pancreatic surgery in children
A. Gusev

Laparoscopic Malone Appendicostomy in paediatric population: 2 centers
long term follow-up
A. Bulotta

Sigmoid volvulus in children and minimally invasive treatment
F. Italiano

Laparoscopic suture rectopexy and sigmoidopexy for resistant complete
rectal prolapse in children
S. Shehata

Laparoscopic appendectomies: medico-economic comparison for "in" and
"out" techniques
L. Fourcade

Effectiveness of tulaa for acute appendicitis in children: a local experience
compared with a meta-analysis
L. Avolio

Video-laparoscopic inguinal hernia repair: single centre experience
S. Patanè

ANNUAL CONGRESS

1:00-1:15
p.m. **PRESIDENTIAL ADDRESS**
Introduction: I. Draghici, H. Steyert

1:15-1:30
p.m. **ESPES MANUAL OF PEDIATRIC MINIMALLY INVASIVE SURGERY PRESENTATION**
C. Esposito

1:30-2:30
p.m. **Lunch**

2:30-3:00
p.m. **ESPES KEYNOTE LECTURE**
Introduction: M. Mendoza Sagaon
Present and future of fetal surgery
C. Giné

3:00-3:45
p.m. **SESSION VI THORAX**
Chairman: S. Clarke, D. Van Der Zee

Posterior tracheopexy for severe tracheomalacia: a new solution for an old problem?

G. Mattioli

Thoracoscopic multistage repair of long-gap esophageal atresia using internal traction suture technique – evolution of the method

D. Patkowski

Preliminary experience of laparoscopic collis gastroplasty and thoracoscopic esophageal anastomosis for type 1 esophageal atresia

L. Pio

Continuous suture technique for anastomosis in esophageal atresia and clip ligation of tracheo-esophageal fistula in newborns

S. Rohleder

Thoracoscopic repair of h-type tracheoesophageal fistula

M. Rygl

The application of percutaneous suturing technique in thoracoscopic repair of congenital diaphragmatic hernia

B. Bogusz

Utility of Fiber Bronchoscopy in the Management of a Neonate with VACTERL Anomalad

B. Savu

12th SEPTEMBER 2019

3:45-4:30
p.m.

SESSION VII THORAX

Chairman: L. Fourcade, P. G. Gamba

Unique Thoracoscopic Technique for Posterolateral triangle repair in Congenital Diaphragmatic Hernia; a Bi-central study

H. Said

Primary focal hyperhidrosis in children: is surgical treatment a safe and effective option?

C. Carvalho

Thoracoscopic sympathectomy for treatment of primary hyperhidrosis in children: a randomized comparative study between clipping and electrocautery techniques

M. Akl

Comparison between standard and thoracoscopic extrapleural modification of nuss procedure- two centers experience

R. Jokic

Thoracoscopic thymectomy in children by myasthenia gravis

Z. Mitupov

Bronchoscopic retrieval of Paediatric Tracheobronchial Foreign Body: A Challenge

N. Nayak

Endoscopic stent application in a child with triple a syndrome and esophageal perforation

B. Tander

ANNUAL CONGRESS

E. Westwood

Laparoscopy in a Central European National Institute: results of the past 10 years focused on complications

Balzas Fadgyas

13th SEPTEMBER 2019

10:00-10:30 **ESPES KEYNOTE LECTURE**
a.m. **How to create a winning team**
R. Mancini | National Italian Soccer Team Coach

10:00-11:30 **Open Coffee Break**
a.m.

10:30-11:45 **SESSION XINNOVATIONS & ROBOTICS**
a.m. **Chairman: M. Soomen, G. Riccipetioni**

Succesfull use of mini-invasive approach in pediatriic hepatobiliopancreatic surgery and in adult-to-child liver transplantation

R. Angelico

Robot-assisted resection of choledochal cysts and hepaticojejunostomy in children : initial experience in 2 institutions

I. Kassite

Glove single port laparoscopic appendectomy versus conventional laparoscopic appendectomy in children and adolescents under spinal anesthesia; A randomized controlled study

M. Abdel Aziz

Indocyanine Green (ICG) Fluorescence Lymphography: a new technique to perform lymphatic sparing laparoscopic palomo varicocelelectomy in children

M. Escolino

Virtual Reality Trainer for Paediatric Laparoscopic Inguinal Hernia Repair - Face and Content Validation

P. Korzeniowski

Fetoscopic repair of myelomeningocele: preliminary results from a single center

A. Morandi

ANNUAL CONGRESS

Postoperative bladder dysfunction and outcomes after mis extravesical ureteral reimplantation in children using laparoscopic and robot-assisted approach. results of a multicentric international survey

M. Escolino

Versatility of the robotic surgery for the treatment of complex bladder pathologies in pediatric age

A. Crucetti

Feasibility of the robotic approach for pediatric lung lobectomy

L. Musleh

Reliability of sutureless laparoscopic inguinal hernia repair in children. Our experience

A. Marte

Partial spleen resection preserving blood supply arising from left gastroepiploic vessels - video presentation of innovative method

J. Babala

Combined full-laparoscopic and robotic splenectomy-cholecystectomy with supra-pubic approach in pediatric patients

M. G. Scuderi

11:45-12:45
a.m. p.m.

ROUND TABLE MIS ESOPHAGEAL REPLACEMENTS

Chairman: **P. Montupet, E. Van Der Veken**

Bowel Interposition (Colon,Ileum)

O. Reinberg

Esophageal pull up

P. De Coppi

Other techniques (Gavriliu)

A. Bonnard

Transitional feedings

S. Amarri

13th SEPTEMBER 2019

12:45-1:30
p.m.

SESSION XI MISCELLANEOUS
Chairman: J. Correia Pinto, M. Lopez

Clinical and functional long-term outcomes of laparoscopic assisted anorectoplasty: a comparative study with posterior sagittal anorectoplasty
M. Gambino

Laparoscopic surgery or conventional surgery in the treatment of hydatid cyst of the liver, experience of a pediatric surgery service.
F. Hatri

Organ-preserving management of splenic cyst via laparoscopy: complications and doubts
B. Frybova

Limits of the laparoscopic approach for hydatidhepatic cysts
I. Draghici

The use of staple technology for partial splenectomy in children: a single centre experience
E. La Pergola

Interest of laparoscopy in the diagnosis of peritoneal tuberculosis
Y. Kerkeni

Endoscopic pilonidal sinus treatment in teenagers
A. Allasia

Laparoscopic advanced procedures in children after open repair of the gastrointestinal tract perforation with peritonitis - a case series
K. Gizewska-Kacprzak

Lunch

1:30-2:30
p.m

Thoracoscopic esophageal atresia repair with "primary" anastomosis: systematic review

A. S. Marinho

Thoracoscopic approach to mediastinal masses in the paediatric population

A. Moga

Thoracoscopic resection of prenatally treated pulmonary sequestrations: report of two cases

A. Morandi

Video-assisted-thoracoscopic removal of retained intrathoracic pleuroamniotic shunts

D. Gobbi

Laparoscopic partial nephrectomy in duplex kidneys with giant megaureter in infants less than 10 kg: two peculiar cases

M. Iaquinto

POSTER SESSION

L5 mm optic with 3 mm working channel single-port for thoracoscopic sympathectomy for the treatment of primary palmar hyperhidrosis
E. Perez Etchepare

Preliminary experience with the use of a new mis technology at two paediatric surgical centres
F. Destro

Thoracoscopic treatment of pulmonary sequestration
F. Varlet

Next step in oesophageal atresia surgery: orthotopic position of the oesophagus
J. De agustin

Pulmonary function after thoracoscopic lobectomy for congenital pulmonary airway malformations:mid term outcome
L. Pio

Totally robotic transhiatal esophagectomy for causic burns in a 2 year old patient
A. Pini Prato

Congenital esophageal stenosis associated to esophageal atresia: how to treat? Case report and review of literature
M.I. Conighi

Thoracoscopic resection of mediastinal cystic lesions: advantages of 3d technology
M.I. Conighi

Thoracoscopic posterior tracheopexy during primary esophageal atresia repair
M. Lindeboom

Predictive value of endoscopic stricture index on the need and number of dilatations in esophageal anastomotic strictures after esophageal atresia repair
N. Di Salvo

The use of new technologies in pediatric minimally invasive surgery: the other side of the coin. Attitude and strategies of the wise surgeon
S. Costanzo

Initial experiences with laparoscopic Heller's esophagocardiomyotomy
V. Dotlačil

Routine screening for gastroesophageal reflux is not necessary prior to gastrostomy in neurologically impaired children
Z. Dokumcu

Laparoscopic cardiomyotomy in children with achalasia
Z. Mitupov

PROGRAMME

9th ESPES ANNUAL CONGRESS

3:00-4:00 p.m. POSTER SESSION III MISCELLANEOUS
Chairman: V. Di Benedetto, A. D. Ram

Technical standardization of MIS management of children with pilonidal sinus disease using pediatric endoscopic pilonidal treatment (Pepsit) and laser depilation
M. Escolino

Middle term evaluation of the simulation model for laparoscopic pyloromyotomy
L. Fourcade

Unicentric experience with epsit for pilonidal disease in pediatrics
A. Pini Prato

Video assisted sclerosis with ok432 of endoabdominal lymphangioma, an effective, safe and minimally invasive choice
S. Silvaroli

The value of laparoscopy in the treatment of blunt splenic trauma
V. Soroutchan

Laparoscopic management of shot gun injury to the abdomen in a child
A. D. Ram

Congenital inguinal hernia treating by PIRS technique: evaluating the learning curve
B. Fadgyas

Objective structured assessment of technical skills for laparoscopic reconstructive surgery in pediatric surgery training programme
B. Tokar

Laparoscopic hemisplenectomy with splenopexy for an enlarged wandering spleen
B. Bogusz

Laparoscopic adrenalectomy in a child with men 2a syndrome
B. Tander

One trocar surgery: experience of a single center
C. Noviello

POSTER SESSION

PROGRAMME

9th ESPES ANNUAL CONGRESS

What do parents think about laparoscopy? A portuguese online survey
C. Carvalho

High demanding procedures in low-volume center.
Our initial partnership experience
F. Beretta

Robotic assisted paediatric hepatic tumor resection. Case report
F. Fascetti Leon

Inter-observer agreement on scar evaluation for uncomplicated
appendicitis using a visual observer scale
G. Lisi

Robotic enucleation of a solid pseudopapillary neoplasm in a
9-year-old girl
G. Spampinato

Star wars: simulation training allows realism without anguish, raising
standards a simple cost effective model of a laparoscopic first stage
orchidopexy and non-operative technical skills simulation
H. Carter

Wrist arthroscopy in children and adolescent - another field of the
minimally invasive pediatric surgery
K. Gizewska-kacprzak

Creation of a virtual reality simulation device to teach safety in the
practice of minimally invasive surgery in pediatric surgery
L. Fourcade

Feasibility of laparoscopic resection of neuroblastomas in patients
presenting selected positive idrfs
L. Pio

POSTER SESSION

9:00-10:00 POSTER SESSION I UROLOGY AND MISCELLANEOUS

a.m Chairman:

Difficulties in Diagnosis and Treatment of Ureterolithiasis in Preschool Children and the Interest of URS-L for Treating this Age Group

A. Halinski

Urothelial papilloma in pediatric age: management and follow-up. Experience in two Centers

C. Bleve

Stone street after ESWL - analysis of patients and ways of treatment

E. Wajszczuk

A single center experience in the endoscopic treatment of urinary stone disease

F. Marinoni

Minimally invasive approach for bladder fibroepithelial polyp treatment

L. Fourcade

Laparoscopic approach of giant mucinous borderline ovarian tumors: case reports and review of the literature

L. Avolio

Minimally invasive treatment of fallopian tube pathology in children: a single center experience

L. Avolio

Robot-assisted vs laparoscopic pyeloplasty in children with uretero-pelvic junction obstruction (upjo): results of a multicentric series

M. Escolino

Correlation between ovarian mass and ovarian torsion: protective factors or negative prognosis?

L. De Biagi

Diagnostic Laparoscopy in Non- Palpable Undescended testis- Our experience

M. Bawa

Feasibility, in terms of efficacy and safety, of Video-Assisted Pyeloplasty (OTAP) in the first 90 days of life

N. Di Salvo

A history of MIS: from the pre-natal diagnosis to the final treatment

L. Sangiorgio

Minimally invasive surgery for complicated neonatal ovarian cysts: a single center experience

A. Conforti

PROGRAMME

9th ESPES ANNUAL CONGRESS

Does the body weight influence the outcome in children treated with robotic pyeloplasty?
S. Sforza

Laparoscopic conservative management of adnexal torsion
A. Piotrowska

Treatment of intrinsic and extrinsic UPJO: surgical outcome shifting from open to laparoscopic surgery in a single centre
G. Mattioli

Shehata technique in the management of non-palpable testis
Y. Kerkeni

Cholelithiasis in children: is laparoscopic cholecystectomy becoming a more frequent surgical procedure in childhood?
Z. Pogorelić

Coelioscopic antegrade sub serous cholecystectomy: about 125 cases
Y. Kerkeni

Minimally- invasive approach in treatment of duplications of the alimentary tract- 5 years experience
R. Pechanova

POSTER SESSION

9th ESPES ANNUAL CONGRESS

General Information

/ CONGRESS VENUE

Municipal Theater City of Vicenza
Viale Giuseppe Mazzini, 39, 36100 Vicenza (ITA)

/ REGISTRATION

	EARLY	POST DEADLINE	ONSITE
Member	280 €	320 €	360 €
Non member	320 €	370 €	430 €
Trainee member	190 €	230 €	260 €
Trainee non member	250 €	290 €	330 €

(VAT INCLUDED)

/ CME CREDITS

Italian Accreditation:

The 9th ESPES Congress will be accredited to the Italian Ministry of Health.

More details will be provided as soon as possible

UEMS Accreditation:

9th ESPES Congress will be accredited by the

European Accreditation Council for Continuing Medical Education (EACCME®).

More details will be provided as soon as possible
